Birth vibration 5

The birth vibration is also called the destiny number in Numerology because it shows the vibration that escorts us permanently, which guides and defines us. It shows our true meaning and the path we should take. The moment in which we follow our destiny path and are in total consistency with our birth vibration, many passages open, opportunities and the right people appear at the right time, and we ourselves are ready to evolve. The more we drift away from the vibration we should follow, the more we will encounter blockages, dissatisfaction or frustration.

The number Five is first of all connected to the idea of liberty, independence and adventure. People governed by this number are always on the move, have their own philosophy and seem like they do not own boundaries of any kind. Because they are optimistic by nature, open and extroverts, they are highly likeable by people around them! They seem very nice, have a great sense of humor and are very flexible to all types of situations encountered! They enjoy taking risks, explore and are very curious about life!

People dominated by this number are creative and are very good in artistic environments such as on stage, on television, in music, art, painting, fashion, makeup, publicity, elocution etc. They are very original in front of an audience, feel really good in public and give their best when believing in something big. Because of the constant search of an ideal, they do not find their place when doing something with lack of passion, are not static and are always ready to experiment, taking their place on top of infidelity and betrayal in relationships. Although they have a big heart, they love hopelessly and are very expressive and get bored easily if the flame can not be permanently revived by something new and exciting.

Everything related to the number Five is contradictory because he enjoys playing, appearing and disappearing, having fun, flirting, belonging but also being independent. Five is a middle number, becoming to border of One and Nine, and so he can successfully use his intuitive, emotional, superior side, but also his rational, abstract and logical one. Of course, it strongly depends on him and on other types of vibrations if he is going to use his qualities and talents in a positive or negative way.

Five is a number of distance and that is why the person influenced by this number is attracted to travels, countries and all types of religion and is highly adaptable to traditions and new languages encountered. He works very well with people of other nationalities and has the capacity to connect settlements (external relations, international affairs, tourist guide, and translator). He always needs to escape in any type of travel possible, even permanently (change the country he lives in) will balance his life and fill it with positive energy.

Intellectually, these people have a striking speed of thought, can make decisions in an instant and have the capacity and will to pass on their knowledge. For this very reason they can be good teachers, trainers, lecturers or writers. They are not very emotional, but are very inspired, creative and original, enjoying the presence of young people or children. In fact, this number has the capacity of staying forever young, to play in the true meaning of the word even after reaching full maturity, to tell stories and believing in those stories, to visualize and create his world as he likes it! He will fight for everyone's right to freedom of thought and action and he will be the one always moving forward and believing his own principles.

However, at his negative side, Five is a number of pleasure, and unattended or being careless can cause instability, extreme risk (dangerous games or extreme sports), the incapacity to form a couple or a family (the rebel or the lover), self-abandon and dissipation (night life, night clubs, alcohol), huge financial loss to vices (bets, financial speculation, gambling), solitude or a very strong ego.

Expression number 8

The Expression number shows the way we "act out" our role, character, temper, the way we express ourselves and

the subconscious purposes we have. This number is a key element to our social lives and in marriage because it shows the way we behave and how we relate to any type of relationship.

This number shows what kind of people we have around us and what we lure, details about our relationships with our friends and business partners, and family matters. Knowing the life path behind this number can help us enhance or limit our energy to balance any type of relationship. Moreover, it is essential to find out the life path of the partners or people we go into contact with.

The expression number can guide us to a certain vocation path, which, wisely chosen, can help us define our fate. Hence, it can be considered a number of careers.

If the life path shows us as we truly are, the expression number talks about our aspirations and tells what we should become.

People who have the expression number Eight in their destiny produce a large amount of magnetism and sex appeal. Almost every goal they set tends to come true and have the strongest aspirations. They enjoy leadership, but from the shadows. Their expression method is based on strategies and well elaborated plans on which they can work for a long period of time. They do not do anything just for the sake of doing, but sometimes can be Machiavellian. For them, the goal is everything that truly counts! They can be stubborn and intolerant!

They have great power of introspection, intuition, clairvoyance, delivering force and a strong will. They express better when they are in complete control of money, power and when their desires come to life!

It is recommended they learn to balance the material aspects with the spiritual side, on which they have great talent and inclination. Moreover, they need to balance everything they do.

In relationships they need burning passion and intense loving. Many times they can end up in the arms of dependency and obsession. After consuming everything, if there is nothing left, they will need a new tank of love and sexuality. Sex is extremely important for them.

The job fields we find them in are: business men, occultists, bankers, directors, managers, strategists, politicians, and generally people who work with money.

Interior Vibration 6

The Soul Number shows the emotional nature, feelings and the way we feel. Moreover, it refers to the concept of emotional intelligence and inner-state! If the life path number shows the way a person behaves, the soul number shows the true contents of his/her soul. Thus, the first refers to behavior, and the second refers to the motivation behind the attitude. In the same time, the soul urge number invokes the secrets we keep or the shadow we do not even know is there. It is also called the heart's desire number or soul urge number.

The biggest wish the person having the Sixth soul number has is to have a family, a partner, children, and help or get involved in other people's life situations. He is extremely domestic, he loves his family and his home, and he gives all he has to create comfort around him.

The love he has for his family and friends is like a happiness source for him, but sometimes, the desire to help others is so strong that he often finds himself sacrificing his own needs to make others happy. Thus, he can end up getting too involved in other people's lives and he risks smothering and suffocating those he cares about with too much affection, and he can end up being too protective with the children and not let them experiment their own little personal power.

He is extremely loyal and he rarely disappoints, but he does need appreciation for his care-taking and commitment. He wants to know others need his help and that he can make himself useful, and he is generous and forgiving, capable of overseeing other's mistakes and see the good in them just enough to decide continuing the relationship with them.

He has the ability to be a good counselor, psychologist, mediator or a healer, and he is an excellent listener, having compassion and understanding. But his challenge as a counselor is to be educated and specialized in this field, so he can offer others more than just sympathy and a shoulder to cry on.

He is sensitive about the surrounding environment and he will do all he can to create an artistic, healing and harmonious ambiance both at work and home. Art gives him much pleasure and satisfaction, and he is gifted with the artistic sense, although he may not be very trusting in his abilities as to use them. Others appreciate him and the love he has to offer and wish to keep him as close as possible, and the love he receives from others is doubled.

Exterior Vibration 2

The outer personality number shows the most visible character side, the way in which others perceive us, what we let others see and the mask we wear in front of the world! It shows the aspects we feel comfortable showing and sharing at the beginning of any type of relationship.

The most visible way others see us is through our jobs, careers or social status, the way we behave in society or how we choose to dress. The outer personality number also shows the interests we have and channel day by day.

The person who has the Second outer personality number is friendly and has little to no claims, has a pleasant exterior and is warm. He is patient and understanding, and a very good listener, having the capacity to make others feel loved and important. He is a pacifist and a conciliator, and others can feel his wish and need for harmony. Although he is a powerful person and the type who "bends but not breaks", he should probably try to avoid being the shoulder that everyone cries on.

If he experiences negative criticism in his childhood, he will most likely end up being shy. Even if, as an adult, he can overtake being shy, a small proportion of vulnerability will still linger and this can be easily sensed by others as well. Because of his sensitivity he can easily become tense in unbalanced environments.

He has excellent taste and an acute sense of esthetics and beauty. There is grace in his movement which reflects his well developed sense of harmony and refinement. His dressing code is tidy and neat, he enjoys comfortable, light and sheer clothing. It is advised he avoids cheap and simple clothing, and make an effort and be more daring in his outfit choices. This aspect will combine with his open and perceptive personality.

The opposite sex is attracted by his gentle and attentive nature, and in the same time takes notice of his passion and sexappeal.

Hereditary Number 6

The family name we have is the Hereditary Number. The vibration behind it shows the family environment, the genetic heritage, the energy and archetypes of our genealogical tree, the family karma, and the flaws and qualities it holds! Moreover, it provides information on the current health state and inborn predispositions we have for certain affections and therapies that help us on their full potential.

It is common knowledge that by changing our family name we face a new direction in life, a change in course or a two way highway. Thus, the karmic heritage of the new family is overtaken, but also the qualities and flaws of the

new family.

The family who has the Sixth hereditary number has reunited in this life to learn the meanings of loyalty, love, education, healing and forgiveness, law, judgment, justice and truth, extremes and balance, harmony, marriage, children and the meaning of "home"!

The members of the Six family have a great sense of responsibility which, unfortunately, can sometimes be used abusively, and this aspect can block the development of individuality. Although it may seem that they desire all that is good in life, most of the time their decisions are based on desires related to the family hierarchy. The children feel responsible in front of the parents even as adult and even after their parents are gone. Life revolves around the home and family and, even if they have many friends, they are always chosen over high standards.

The family that has the Sixth number desire harmony, do not want to upset each other and are very loyal. Although, it is advised they do not create dependencies over one another and not repress their personal desires even if they are not liked by the other family members and all they do must be out of pleasure and not out of obligation!

Usually, their home is welcoming, warm and wonderful because the energy of the number Six distinguishes itself through refinement, good quality and good taste.

Whereas the love inside the family can be unconditional, many of those who have inherited the energy of Six should apply this principle over those whose life perspectives are different than their own. They must not judge others based on their own beliefs and convictions and avoid reaching extremes out of the desire of making their ideas well known!

The main cause of what we call hereditary disease can be found in the hereditary number. Reducing the stress this number produces may reduce the possibility of hereditary diseases such as allergies, asthma, and all other diseases of the respiratory system or those affecting the ears, eyes, nose, throat, sexual organs and kidneys. Stress is caused by the need of power, scandals, unresolved guilt, court trials, great dependency and lack of freedom.

Intimate Number 6

This is the intimate number of the person dominated by Venus and born in the days of the 6th, 15th or 24th of any month.

Unfavorable times: Partially April, October and November are not favorable at all. When Venus is retrograde diseases may surface, and bad news and obstacles will be inevitable at work.

Favorable times: The 20th of April – 18th of May and the 21st of September – 19th of October are very favorable and strong periods of time, especially the intervals 20th - 30th of April and the 1st – 19th of October.

Dates with great impact: The 6th, 15th and 24th of any month are favorable, but also the days of the 3rd, 9th, 12th, 18th, 21st, 27th and 30th.

Days with great impact: Wednesday and Friday, and when they coincide with any date mentioned above, they even bring good fortune!

Important ages: 6, 15, 24, 33, 42, 51, 63, 69 and 78 are favorable.

Maturity Number 4

The vibration of the **Maturity Number** is extremely powerful because it holds together the vibration of two important numbers. **The Maturity Number** is calculated starting from the full name received at the time of birth and the complete birth date, respectively **The Birth Number (The Destiny Number)** and **The Name Number (The Expression Number)**. **The Maturity Number** is the one that indicates the qualities, desires and dreams of a person, but these begin manifesting somewhere between the ages 30 to 40 years old.

With the Maturity Number Four comes the development of practical and organizing abilities as the person grows older. He becomes pragmatic and more realistic. This person will perform tasks with more ease and speed, managing to give a vivid form to his dreams and aspirations. He will develop the desire to build something through taking baby-steps. Moreover, he must learn to live his life instead of working continuously!

Karmic Number 3

The karmic numbers are one of the most interesting and provocative numbers of numerology. The karmic numerological interpretations help us balance past experiences, and understand the reason we lack certain things or why we must deal with certain types of situations!

The Third karmic number shows that in the past, the person governed by this number either manipulated through words, lied, abused knowledge, was ignored when passing on information, destroyed information or even let secrets see the light of day! He must learn to behave in society and tell the truth, teach others what he knows and truly desire elevation and knowledge!

This person might be dominated by a critical spirit of which he wants to abuse or can not control. If he will not admit this to himself and will not try to overpass it, he risks not doing what he enjoys throughout his life, not truly live and create a major blockage! Moreover, he can show too much seriousness and because of that he must be more optimistic and more joyful, must learn to love life as it is and must be more willing with himself and share his happiness with others.

The person with the Third karmic number might have established a standard of perfection impossible to reach as a singular action direction, but life will bring situations where imagination and communication skills will be needed the most. He will most likely be tested in these particular fields and forced to face challenges. He has an inclination towards art and can become highly appreciated, but he will meet success only through hard work, learning and perseverance.

At the opposite pole, this person might be obsessed with knowledge, by the constant search for answers to a great deal of questions, with analysis and science, and with writing and reading! If that is the case, he must learn to live free, without handing out quotations or living the life of others.

The effect of the Third karmic number can be diminished if the person has at least a single element of Three in their personal basic numerological structure.

Karmic Number 7

The Seventh karmic number shows a person who has refused spiritual evolution, knowledge and faith, or this person was fanatical and made others follow his beliefs!

In this life, he must learn to correctly approach knowledge, not abuse it, and not play with divinity and other powerful energies in a negative way, and he must learn to discover himself on a deeper level! It is recommended he gives himself to spirituality in any given form, but remain in balance, and not abuse certain substances or alternate states of mind!

Because he might lack will and determination to perfect himself or certain skills he owns, it is advised he learns to be his own critic without condemning himself or being too harsh. In this way, he will be able to develop his abilities and use them at their full potential.

The effects of the Seventh karmic number can be diminished if there is more than one single element of Seven in their personal basic numerological structure.

Dominant Number 1

The dominant numbers are the vibrations which can be usually found in one's full name. The bigger their presence is, the more the manifested influence can change the entire balance of the whole numerological picture. It is essential this vibration is correctly understood and used, integrated and balanced. The only barometer that can measure the energy given by this vibration the proper way is the person itself.

The person that has more than a single element of One in his name can be extremely stubborn and maybe too determined in his will to rule, stand out, impose or be a leader! He always puts himself first and only sees after his own interests, and will often hurt those around him with his defying arrogance. He is also competitive and prepared for quite a few battles and sees an opportunity to stand out in everything. He has a lot of inner energy which he must channel the right way, otherwise he is risking often anger outbursts, aggressiveness and brutality.

It is advised he learns to be assertive, correctly take part in society and establish harmonic connections with those around him, to rule but not impose or dictate, to individualize himself, but not isolate, and stand out through qualities, not through brute force!

Correctly used, the energy of One can transform these persons into exceptional sportsmen, into leaders with excellent ruling abilities or into a person who knows himself perfectly and who can take control in every situation or moment of life!

Dominant Number 8

The person who has more than a single element of the Eighth vibration in his full name can have a very strong character, risking and living to the edge every step of the way! He has a great desire to move forward, overstep boundaries, transform, grow and evolve. He possesses great determination, a powerful mind, knows when to act and how to act, and if by any chance he falls, he will rise more powerful and more determined from his own ashes.

Eight not only refers to the power within the self and mind, but to material force as well. In this way, a person dominated by this number can be fortunate financially speaking and rich, with a wide vision over money and can have an immense force of materializing every desire. He can be a good businessman, he can have the privilege to be born in a high-ranked family or he can easily climb up the social ladder. At the other extreme, he can be confronted with many losses or frustration regarding finances and resources and he must learn to distance himself. He must not consider money a prize, but a means to an end.

In the same time, it is advised he does not use power to manipulate, control or buy people around!

Matrix 11

The path of One inspires freedom, courage, the search of inner-self and independence, barrier rupture and the need to individualize, be self-made, have self-trust and have the power of free speech. One is also the first or the

one in the front of the line, so it also shows leader qualities, the mental system, either weak or strong, the character, the ego and the way of simply being extroverted or introverted.

One has a masculine vibe, fiery, being the beginning of all things, the mind and the creative power. It also shows instinctive functions, high resistance under mental pressure, and the level of which someone can be corrupted or influenced.

One is associated with the head, so this cell shows everything physically connected to it, and all symbolic associations, such as power of thought and the mental power altogether. Please take notice, this cell does not include intelligence and reason!

The more Ones we find in a cell, the more the inner-energies rise, the qualities and traits being amplified. An even number of elements shows the energy is oriented towards the exterior, and an uneven number of elements show the energy is oriented towards the interior.

The positive aspect of the 11 configuration is the desire for unity, help and cooperation, and the negative one is related to duality, doubt or dependency!

In the first case, this type of person is very balanced, cautious, capable of seeing both sides of a coin, harmony loving and very calm. They only wish to bring peace to people around them, have diplomatic and mediator traits, and are very good advisors. They can analyze a situation extremely good and divide the perspectives, and dedicate to two directions simultaneously.

In the second case, the person with 11 can have a double identity, can be dual and duplicative, undetermined and in a permanent unbalance. Going back and forth between opinions, he easily changes moods, needs someone to count on, is dependent of other's approval and lacks initiative spirit! Moreover, they can easily shape shift after people around them, can adopt their style, personality and way of being. They imitate, copy and mirror what they see, and that is why they can manipulate with ease and dissimulate. They know how to make themselves pleasant and likeable, and know how to use their adversary's weapon to their own gain to win! They give what they get, so they can be vengeful when harmed or an angel if you know how to talk to them!

Many times the 11 can reach a crossroad, confront situations in which they have to choose or experience extreme turns in various situations!

Matrix 2222

Two is a feminine, passive and introverted number. Being the exact opposite of One which represents the mental and masculine qualities (paternal, leader oriented), Two represents the energetic, maternal, emotional, altruistic, generous and cooperative qualities.

Two is the archetype of the woman as a mother – wife, of the priestess, healer and shaman, but she is also the embodiment of the evil woman, of the vampire or temptation. In the first case, the vibe refers to the emotional side of a person, at the amount of empathy, sensibility, perception and intuition the person owns, and in the second case, it refers to the ability to seduce, to desire and passion and sexual energy!

Through this cell we can observe a person's wish to help others, the amount of emotional and energetic involvement, the capacity to motivate, protect and guide those around us, as well as the capacity to work with noble souls and subtle energies.

Two symbolizes inner experiences and has the ability to make them a reality, and deliver them to other people's souls, hearts and minds!

Two is strongly connected to emotional intelligence and so it works independently from the other cells and can overtake control in any situation if needed. It is a cell that reacts powerful to stimuli and which keeps the subconscious memory of pleasure and distress. This is where feeling, events and benefactor people are associated. Two has a connection with the emotional memory and with the subconscious one!

No matter how cult, rational or educated a person is, when the emotional energies are strongly activated, that person can lose control and can act accordingly with their feelings! In this cell the emotions become bodily, so health may be affected!

Two is also representing the bio-energy of the organism. Every person has around him or her his own vibrational field, so the more elements this cell holds, the more this field is helped to grow and correctly used, can help heal and self-heal!

Two is a center with a huge reaction force that also has a huge power of signature. The people who have many number Twos have the capacity to influence the environment, to make it fertile and to bring it to life!

The system with uneven elements has the tendency to absorb energy and the one with even elements has the tendency to spread energy!

The more elements appearing in this cell, the stronger the system gets.

From an energetic point of view, the range of these people is widely spread, and if the energy is positive, they have the gift of supporting others, recharging them, raise their vibrations and heal them! Because of these qualities, they can be excellent bio-energy-therapists or distance healers. They have the gift of perception, of entering other people's range fields and energetically modify or clean structures! They have the capacity of perceiving presences that are not from our physical world, to hear or see what others can not, to synchronize with very high and subtle frequencies!

Even if they do not work in alternative fields or even if they do not practice these kinds of things, these people have very much to give on this vibrational level. They only have to step in a room and the energy in that place will rise and others will sense their positive presence! Even more, they are those to motivate us, feed our souls, attend our wounds and inspire optimism and trust! Whatever they do, they do it with passion and determination, putting their souls out in every project they carry, action they are doing or person they are meeting!

At the other pole, if the person having a large amount of Two elements in the cell is dominated by negative feeling and emotions, he or she has the ability to materialize them quickly, being a constant danger for their own self and for others. In this way, they have the capacity to curse, hex, work "magic" and negatively influence people around them, to hypnotize and manipulate until destruction. Being very powerful on an energetic level, you can hardly escape their influence! The energy, power and inner strength they spread can be addictive to people around them!

It depends on how this system is used because it can help create a path to sublime greatness or destruction and self-destruction!

Symbolizing the archetype of the woman, the qualities are growing in the same time as the growth of elements in the cell – intuition, dedication, compassion, empathy, perception, melancholy, dreams, the capacity to take care of other on an emotional level, the capacity of feeding energy to other and so on. Woman or man, these qualities feel stronger as the number of elements rises, being capable of transferring emotion to those surrounding them!

As far as relationships are concerned, they are fiery, give everything with passion and expect everything back! In a positive manner, they are the ones who make you feel loved and unique, and in the negative way, they are the ones who can dominate, manipulate, and energetically or emotionally harass. Because of the exaggerated desires and

emotional states, they either idolize or become executioners for the people they love, or, on the contrary, for the people they hate!

On a sexual level, they are hypnotic, passionate and impetuous – they give themselves up completely, merge and unite with the one they “possess”. For them and for people who care for them, love can be exuberating, elevating and even close to reaching the nirvana state. Moreover, they can use their powerful sexuality as a weapon or tool to get what they want (money, power, higher social position or even people)!

The people with more Two elements have a large emotional memory so they do not forget anything and choose to be vengeful! In the same time, they are very creative and have the gift of materializing everything they wish for!

Because Two is associated with liquids as well, it is recommended they take care to alcohol, dependencies, blood flow and to the body’s ability of retaining water. Although, the presence of water is helpful and it can calm them on an emotional level!

Matrix 3

The number 3 is masculine, extroverted, active and an air element. It is in very close connection with the capacity to rationalize, receive or give information forward, with the capacity of thoughtfulness, assessment, and communication!

The primary function of this cell is to unite the first two, bringing together the exterior energies (One) with the interior energies (Two). Three has the ability to withdraw information from the surrounding environment, easily connect them, withhold them, turning them into networks and pass judgment, reason or opinions!

The more power this system gains, the more interest the person will have in working in a certain domain in which he wishes to specialize, know all there is to know about that specific domain, and inform everyone else around them! The information received can come from different dimensions – by self-learning, school learning, observing, clairvoyance, reason or simply by being a person who detects and receives information through separate dimensions!

This cell is also connected with the oratorical ability, to voice, tonality and the capacity to get the attention of everyone through words! It shows the power of speech and making themselves understood, and it relates to the easiness of understanding, learning other languages, and memory!

Moreover, the Three system works based on self-independence and can control the first two systems of One and Two. If One is working on the psychic level and Two is operating on an energetic and emotional level, then Three is working on a mental level!

The system with only one Three is the most common, showing Three’s limits on a normal level, without outstanding capacities. Most people own a single Three and are very rational, smart, they communicate easy, are a part of society having different levels of intelligence and nor having frustrations or problems in this particular field.

The Three system can be influenced by other systems of the numerological matrix, such as the systems of One and Two, but also the systems of Five and Nine. If one of these has full potential, the value of the Three cell will most likely rise as well!

At their negative pole, because this is an uneven system, thus being oriented towards the interior aspects of life, they can be highly uncommunicative, shy, introverted and have reduced levels of intelligence. Although, this deduction must be based on the entire numerological matrix and numerological research, on facts and obvious behavior!

Matrix 4

The number Four is masculine, physical, introverted, passive and earthly. Thus, this system refers to the physical figure (body), material world in its tangible meaning (humanity, past, history) and to the attraction towards the earth (construction, shaping, and projection).

From the physical body point of view, the system refers to resistance, corporality, health, physical force and to the capacity to use our body for working, for obtaining something, and for winning. It shows the relationship we have with our body, how well we use it and how we can use its capacities for full potential!

In this cell, we can also discover the attraction of this person to all that is tangible, and to earth and to the capacity of studying, understanding and use it accordingly. A well developed Four system shows those who project, build and shape the earth and use whatever it can offer.

Four also symbolizes structure, law, order or discipline, both in depth of the physical body and on the exterior on a social level. Thus, this system shows on one hand the capacity of this person to understand how the human body works and how to use it to obtain the best results, and on the other hand it shows the capacity of this person's understanding, integrating and working with the general structure of society.

The system that has a single Four element shows normality. This system can be influenced by other systems, especially the systems of One (the psychic formation), Two (bioenergy) or by Eight (extra sensorial capacities). That is why the matrix must be carefully studied in connection with all of the other elements.

Physically speaking, the more power the system has, the more this person knows himself and has better control over his life. Resistance, flexibility, reactions, coordination, balance and so on, are characteristics of this particular system.

The people that have more elements of Four have a bigger physical endurance, and that is why they can work in the hardest of conditions for a longer period of time, and use their strength for different activities and are very corpulent. They have a good connection with their inner-self and rely on their senses, and they have natural strong reflexes and can coordinate their body very well.

They can be well-built without any effort, massive, robust and strong, or they can be flexible, tenacious and athletic. As such, we can find them in various fields of work, from a common carrier, breaker, and lumberjack, up to sportsmen, gymnasts, contortionists or soldiers. The physical effort does not exhaust them, the pain is tolerable and the resistance in front of disease is higher.

Because of their good relationship with their own body, they can control it very well despite meteorological conditions or despite the efforts they must endure. The reactions, coordination and balance are inborn traits. As such, they are the ones who have the capacity to withhold in front of pleasure, to resist famine, cold or extreme heat and can use the true abilities of the human body! Thus, they can be anchorites, can hold jobs for long periods of time and can live in fierce conditions.

If they choose the path of sports, they will not have problems with using their force, run, swim, and coordinating all muscles, organs and senses. They are well aware their body will not collapse, and are not frightened in front of obstacles or adversaries. They are the ones entering long lasting competitions, having endurance, escalating, climbing mountains or going down gulfs, sinking in various waters or wishing to fly. If their system is even, they can be extremely good coaches (fitness or bodybuilding), professors (in sports or jobs that require physical strength) or advisors (nutritionists) for those around them. Moreover, they can use their capacities for the welfare and health of others (lifeguards, mountain rescuers, stretcher-bearers, firemen, bodyguards).

Their interest for the human body and the understanding they have can lead them in the healthcare field, being good doctors, nutritionists, estheticians, kinesiotherapists or researchers in the field.

If they go down the army path, they will be disciplined, prepared and trained. They can resist harsh conditions, can face pain, can do one on one combat and can control their reactions. They are naturally soldiers and can make a career out of it. Moreover, by understanding the meanings of mundane law and order, they can be extremely good leaders, strategists, commanders or generals, or they can work with all of these concepts theoretically, by them making the law, structure and apply it by being members of the state, governors, presidents, judges and so on.

At their negative pole, they can make their body a temple and create some kind of obsession over their body, becoming somehow fanatical over fitness centers, esthetical surgeries and bodybuilding chemicals and toxins, or over dieting. They can be narcissistic and too drawn to the physical figure than by anything else. Without a developed mental system, without reason and intelligence, this system will break and work in their disadvantage, leaving them abandoned to physical pleasure or powerful physical desires, such as eating too much, becoming reliable prey to taste, being nymphomaniacs, drawn to extreme sexual pleasure, they drink or take various drugs, only wishing to overtake the physical barrier. In this way, the body becomes a prison they can not escape and a system that takes control over anything and everything else by slowly destroying them.

From another point of view, this attraction towards the earth can take other forms as well. The people with a well developed system of Four can be drawn to researching, studying, working or building earth. They can be geographers, topographers, urbanists, architects or draftsmen, as well as geologists, speleologists, seismologists, sculptors or even gardeners.

Moreover, they have the capacity to construct, build, and create a base for something that will last throughout time. They know the meanings of patience, long term constructions, and make everything through small, baby-like steps. They are good in real estate, on construction sites, imposing buildings or working with the natural resources of earth. They are conservative, know how to use time practically and know how to gather the past experiences to cherish the future. In this way, they are drawn to history, roots and traditions (historians, archivists, archeologists, sociologists).

The system without these elements shows extreme features. In this case, the absence of Four can show a small body resistance which destabilizes quickly and restores even harder, and a fragile general health. It is very important to watch the systems of One and Two because they can save this absence from destruction, or they can help destroy it even more. A strong system of Two can lead to self-healing and a strong mind (the power of One) can support the health of the body!

If all three systems are weak, the body has low immunity and can not fight even the smallest disease and even these small ones can be fatal.

At the other pole, if the absent system works at the other extreme, it functions just like a system with more elements of Four.

Matrix 5

The number Five is a masculine number, active and extroverted. It is placed in the middle of the numerological matrix and that is why it represents the inner-self. The inner-self is represented in most psychological theories as being a center, a midway, an interior entity, and this is by far the hardest archetype to comprehend.

The inner-self is considered to be the absolute of consciousness, the base of the entire existence, the way and matrix of awareness by continuing the Ego. It is the middle point of the personality, representing the final goal of individualization.

Based on some definitions, the Ego can be material – physical (self-image), spiritual (self- image on a cultural and informative level) and social (social identity).

By bringing together the psychological and numerological meanings, the center of the matrix represents the self-image, ego and self-trust, the desire to lead, to be upfront or the desire to merge with others, the sense of self-identity, the principles, inner-rules and life philosophy, the intuitive level, clairvoyance and premonitions, the creativity, inventive capacity, the arts and the stage, the capacity to be unique, the love, heart, the solar plexus and the heart chakra, the openness to the world, the extroversive level, the mystical experiences of consciousness of the inner-self, the relationship between the inner-self and others, the joy of life, the will to live, happiness and joy, the capacity to synthesize, to express and detach, the capacity to receive and offer from the heart, generosity, the will to travel, to know and gain experience.

The system of Five is very sensitive, mostly because it is the center of all numbers and that is why it is easily influenced, sustained or blocked as well as it can sustain all of the other numbers!

The existence of one Five is good to have because it will secure the passage of energy through the center and will overtake all other systems, filter them and send everything in the exterior! Moreover, it is important to analyze the most powerful cell because it is the one that sends the most powerful signals!

Matrix missing 6

The system of Six on one hand refers to work and physical activities, to the capacity of a person to be practical, organized, responsible and determined on the physical level, and on the other hand, it refers to sexuality.

From the point of view of the first interpretation, the Six system shows hard work, power of execution, the level in which someone can pursue their desires, the capacity to plan, organize, practice and arrange. In other words, it means the capacity to function on the material plan, of being efficient and win where others fail! A big gathering of elements shows high capacity to stay realistic, routine and being earthbound, but it also shows the attraction to money, possessions and luxury. These people tend to bring to reality everything they see, hear, know, feel or desire. If the system allows it, they can materialize their emotions, feelings and inner-state!

Every system of the matrix coordinates and influences an organ from the human body and in this case Six is attributed to the genital organs. Thus, this system represents sexuality or an attraction for physical pleasure and intimacy!

The systems that lack elements show extreme traits. In this context, it can symbolize a person who dislikes physical work, or can not respect a timetable, or who can not take on responsibilities. This fact can be determined by many factors, including physical capacities, sedentary life, or even the fact that this person might not need money or maybe he has another type of job, such as singing, painting or composing poetry. These can also be considered jobs especially if this person lives by doing so, but they do not require physical efforts, routine and so on! In the second case, this person may not have limits in front of work and desire to reach the top at any cost and the only thing that makes him happy is getting material results because of what he does!

Sexually speaking, the people that lack the Six element can have blockages, frustrations or problems. Somehow, the sexual energy is not correctly used or is chaotically managed. It can also show a person who has an intense sexual sense!

Matrix 77

The cell of the number Seven symbolizes the tendency towards spirituality, religion and philosophy, and the capacity of integrating and understanding metaphorical, symbolic, irrational and intangible concepts of life. It makes the connection between the subconscious archetypes and dreams, high spheres, signs and superior guidance. In the land of Seven we find a world of magic, myth and fantasy, and of stories and miracles.

If the system of Three is rational and logic based, and correspondent to the left side of the brain, the Seven system is the exact opposite, being imaginative and in close connection to the right side of the brain.

The human brain is made out of three main sections: the archicortex and the two cerebral hemispheres, the right one and the left one. Every hemisphere of the brain has its own conscious thoughts and its own memories, and, even more, the way of thinking and operating are very much different.

The right hemisphere (the Seven system) is the premises of creative and imaginative functions, and the left hemisphere (the Three system) is the premises of reason and abstract thinking. The right side perceives things globally and the left one analyzes everything down to the last tiny bit. The left side has an analytic, sequential and logic thought system. The right side tends to process information in a non-verbal, simultaneous, intuitive, interpretive, extemporal and imagistic way. The left hemisphere excels in details, processing information on a lower scale, whereas the right hemisphere is better in recognizing patterns. The right side is a riddler by nature, absorbing information quickly on a larger scale while the left one needs time to process details.

A person with both systems fortified or equal uses both hemispheres in the same time, is balanced physically speaking, but also psychically! In case one of them is overused it can cause a major energetic imbalance. The right hemisphere also has these potencies: intuition, clairvoyance, telepathy, empathy, creativity, receptivity, acceptance, offering and so on, all of these being qualities that help with the connection with the divine source.

The Seven system also corresponds to the subconscious, the Alpha waves and modified states of consciousness! Moreover, it has a strong bond with the planet Saturn, with karma and past lives.

From the religious and spiritual perspective, a strong Seven system brings an unchangeable belief in God, in the Universal Energy or in a higher divine form. This person does not have to search in order to believe and has the power to abandon oneself to these forces naturally. He keeps deep in his subconscious the memory of the afterlife where the soul detaches from the body and fuses with the whole, but it also keeps the memory of all attempts he has gone through in other reincarnations, and he is keeping the memories of all lives lived near God, but also the memories of the lives lived in the extreme of detachment and self-abandon! Thus, he will search to be near that perfect world or near that permanent wellness state, but will also have fears and panics that are not justified in reality.

To be closer to divinity he can choose the path of Churches, feeling good while fasting and preying, but he can choose the path of other beliefs as well. He has great power when meditating, when introspecting or when contemplating, and, in this way he is helped by angels, saints or higher entities. In fact, he will always be guided, his questions will always be answered and signs will be shown to him and in the harshest of times, an “unseen hand” will protect him or save him! He may have prophetic or lucid dreams, revelations or premonitions, and he can visualize and easily “connect” with the information provided by the Universe. He only needs to have self-trust, and be open to whatever it is that is shown to him and he will always be on the right path.

He is sentimental and a dreamer, kind and sensible, compassionate and empathic, but if there is nothing that holds him down in the physical world then he will be lacking practical sense, and he will be indecisive, sedentary, easily influenced, indulgent and easily hurt.

The Seven people make the connection between the earth and the higher spheres, and that is why they live in two parallel worlds, with one half in the physical plan and the other in the metaphysical plan. For others around them, they may seem split from another Universe, airheaded, weird, or even mad, and many times they have problems

discerning the boundaries of reality and of imagination or even other dimensions!

They find themselves through spiritual practices, and that is why they may be supporters of yoga, Zen practices, kundalini, and reiki and so on.

Through his negative extreme, this person will try and reach that state of well-being through the consumption of substances and liquids that help him disconnect from reality, such as alcohol, drugs, psychedelics or hallucinogens.

Moreover, art, in all of its forms, delights him, calms him down, and helps him detach from the outer world. He has creativity, works with his imagination, with shapes and ideas, being very talented (he can be a writer, especially science fiction, scenarist, poet, painter, musician, dancer, photographer) he has the gift of seeing beauty where others see ugliness, dirt and depravation. He can also be drawn to philosophy, psychology, sociology and everything that is related to man or humanity in general.

The number Seven is governed by Saturn, the zodiac prosecutor and the planet that represents maturity, karma, trials or owed "payment". Under this aspect, this individual can have harsh physical experiences, can face tragedies or difficult outcome, life experiences that will eventually make him stronger, purify him and will make him change! In the second part of his life he will have wisdom, experience and will perceive the world differently! On the other hand, under the same aspect, he can be born under a lucky star, and he can be here presently because of the rewards of past lives.

If the system of Seven is strong and is not supported by other systems, the people dominated by it can lose themselves in their own subconscious, in dreams and feelings, becoming paranoid, psychotic or mad. They can suffer from hallucinations as well, they can hear things, have insomnias or have nightmares.

Matrix 8

The number Eight is the double of Four. If the first is connected with the physical body, with matter and earth by being a number of plane dimensions, the second one is connected to humanity, to Earth as a whole and with tridimensional space! The first number is represented by a square and 2D, and the second is represented by the cube and 3D!

The Eight people are drawn to space and time, geography and human races, to the position of Earth in the Universe, to shape shifting, spatial geometry, patterns and international order.

If the system of Four builds in the physical level, Eight builds in space, having the capacity to break the surface of normality, to project himself in the future, to have a different view of life and all surrounding him. Eight is also a visionary put in connection to the imagistic, to futurism, creative imagination, clairvoyance, space orientation and the ability to see patterns, shapes, new ideas and transformation! Creation can take virtual and holographic shapes.

Eight is infinity, the transformation of old in new, is the bridge between the past and future, death and rebirth. That is why, used positively, it shows the power of creation, and used negatively, shows the power of destruction! Eight is in connection with other dimensions, with the paranormal, parapsychological capacities, science-fiction and everything else coming from the future!

If Four is attracted to man, Eight is attracted to mankind. The Eight people have the capacity to captivate audiences, to make themselves heard, to hypnotize, manipulate and rule.

As a double of Four and the cube of Two, Eight reunites body and energetic soul, and creates desires, ideals, passions and powerful goal until the limit of sacrifice and self-destruction! People dominated by this system feel like they have debts, take their missions very seriously, and know they have something to do on Earth! They can

develop strong affection or dependencies.

The system with only one Eight assures a level of responsibility in front of life and other people, having normal limitations. The system can be influenced by One, Two, Seven and even Four.

Matrix 9

Nine is an active, masculine, extroverted system that represents the cube of Three (3x3).

First of all, referring to the intellect, the Nine system is in strong connection with the capacity of thinking, knowing, having rational activity, operating with different notions, such as the mind, memory, reason and thought, having the capacity to form opinions by being sharp, reflecting, mediating, pondering, considering, conceiving, creating something solid, caring for someone or something and appreciating facts. In one way or another, the Nine system holds all this together and also holds the systems of Three and Seven together, by basically being a person capable of using both brain hemispheres in the exact same time, without exceeding one in particular!

By being a superior system of human traits, it also represents morality, ethics, behavior, and manners accordingly to the moral principles which basically makes the difference between intentions, decisions, and righteous actions (good) or misguided actions (bad). A good moral code is a system based on a certain philosophy, religion or culture. Moreover, it is in close connection with concepts such as humanity, compassion, philanthropy, tolerance and idealism!

This system also shows the expansion capacities, both on a mental level and on a geographic, physical level, for it is the system of traveling, of far away places, of strangers and foreign places, of the ability to understand others and of integration in another place apart from the birth country. It also shows the level of flexibility and expansion in thought and movement and answers the question: how far can one reach?

The absence of Nine could not be possible between 1900-1999 because every birth date contained at least one element! As such, the presence of one element of Nine is normal and all interpretations must be made in relation to the other systems!

If there is a numerological matrix without a Nine element, it will behave like a blocked system, closed and frustrated, or, on the contrary, it will behave like a system with many elements!

More than one 9

People who have an extremely active Nine system have a fantastic memory! They remember easily the places they have been to, the situations they have gone through, the people they have made contact with, and the smallest details others would have a hard time remembering or paying attention to. They have the capacity to store many memories, emotions, sensations, and dates and information they might use later in life. This can be in their advantage because they are quite handy and have many talents, but it can also be a disadvantage because they can be haunted by regret, bad memories or they have repressed feelings and permanently tormenting thoughts!

They can be logical, but also very creative, their mind being very elastic! They have great understanding power over their life, they know and learn, but this does not mean they are necessarily diligent! They are the ones that catch any information very fast, do not find it hard to find the logic in something or even make associations, and, if they truly become passionate over something, they end up being experts or professionals. They know how to pass on the information they have learned, and that is why they are good communicators and preachers, or professors and writers.

The more elements the Nine system has, the more this person's perspectives over life, over humanity, over a certain field or over the future are full of openness! He is a visionary, an idealist, a person capable of taking the leap towards something greater, and, in the same time, he has the gift of inspiring, cheering or leading others. His way of thinking and perceiving things makes him capable of placing himself in other people's positions, understanding their motivations, being a judge or an exceptional observer. His mind is free and open towards anything it can comprehend, he has a vivid, creative and inventive imagination and he has a great lust for knowledge.

As for the vocabulary, the Nine people are very complex, holding and mastering the art of speech, knowing how to use semantics, nuances, the simplicity or extravagance of a language, they know how to narrate and how to put in writing what they have to express. They can get to someone's heart or mind through words, knowing the exact way in and knowing the exact way how to reach them so they can make themselves understood! Foreign languages do not seem hard to learn, but if they choose not to learn them, they will make themselves understood through gestures and expressivity no matter the situation or person they have to speak to.

Being so mentally flexible helps them adapt effortlessly to any situation or place, disconnect or ignore what others might find annoying, shape as they need to and strongly mentally hold in front of stress! They have the capacity to travel with their mind very, very far, disconnect from the daily life, imagine and create, and project the future and lucid dream!

Because this is the system of traveling, the Nine people can go far away without hesitation, postponing or too much stress. They are willing to take long journeys, see new places, wander on mountain tops and travel all around the world. They do not have integration or social issues, and they have the benevolence of respecting the habits and traditions of others. Ethics, honesty, moral values and inner principles are far more important to them than religion, ethnicity or human race!

Vibration 8

0 - 31 yrs

Saturn, governor of Capricorn, is the senior of the karma, God of time, guard of the door to the past, the one who brings maturity and wisdom at the same time with the things well done, meant to resist in time.

The energy of Scorpio is of a transforming kind, like the Phoenix Bird that is reborn from its own ashes. It has the role to burn everything that no longer complies with us and make room for a new beginning, a foundation for something more durable in time, more solid.

Therefore, year Eight refers first of all to transformation, death and rebirth of all that is old in our life, of the past that does not let us go further, of karma.

In the natural order, coming after a year Seven, that of interior remodeling, the Eight rebuilds, washes, purifies and transforms all the energy to the exterior, being at the same time a new beginning ($8=7+1$). In esoteric symbolism, the sacred number 888 represents Christ, archetype of death and rebirth. Upside down is a symbol of infinity, of endless life.

It symbolizes all the past, the present and the future, it is focused on this moment, now. All that has been done until the present happens NOW and everything that will be in the future starts from NOW. We always create the present from the past and the future from the current present. This is the essence of karma, the symbol of the snake that eats its tail.

Also, through the vibration of Scorpion, the periods influenced by Eight are related to power, money and business. It is good to work on a strategy, follow it and act. It can be a period of great material winnings or losses,

depending on which way we want to act or what we have to correct.

It is advisable not to give up on personal ambitions, to keep focused on what we want, because in the periods ruled by number Eight we benefit from greater strength and a more powerful psychic. The challenge is to achieve a greater degree of detachment and understanding of the fact that power must be used for the good of all and not for destruction. It is advisable to let go of arrogance, intolerance, impatience or egocentrism and to take into account the opinions of others.

When a long period of time stays under the vibration of this number, it can be related to a major financial growth if the person follows the opportunities, risks and acts in this sense. At the same time, it can symbolize a long – term employment in the area of finances, banks or related to the administration of other people's goods.

Operating at a subtle level with karmic energy and with illnesses of a spiritual nature, number Eight draws attention to health. In these periods accidents may happen that can lead to surgery or injuries, So that it is good to learn from past mistakes, not to remain anchored in them, to transform and evolve in a positive way, cleaning ourselves at a spiritual level.

Eight is the number of power, organization and ritual; therefore, ambition, authority and leadership talent are encouraged. It is good to fight against obstacles, to draw up ambitious strategies and act to win.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Businessman, accountant, administrator, treasurer, bank worker, financial analyst, banker, surgeon, private investigator, politician, builder, judge, executioner, mortuary affairs, moneylender, strategist, manager.

Vibration 3

31 - 40 yrs

Number Three defines balance and sufficiency. Three points are the minimum sufficient to define a geometrical plan or to make a stable seat. Number Three rapidly embraced the significance of “divine perfection” and completeness. On the third day of creation, God made things appear that together with the work from the first two days, completed the elements strictly necessary to sustain life. Actually, the days of creation go in parallel series of three.

Number Three appears in universal culture as a type of magical sign, full of hidden cabalistic meanings and strong mystical connections. Pythagoras defined this number as the sign of perfect balance for stability. The most eloquent example is the Holy Trinity, the equilateral of Divinity, in which the three constitutive elements are in a perfect equality and interdependence ratio.

The vibration of the number Three refers to the togetherness of the individual spirit – male (One) with the interior – emotional – female (Two) to find a balance in the exterior (Three), to manifest to others what was discovered in the first two (individual and interior) phases, to extend to a wider horizon. In brief, it refers to the expansion (Jupiter) outside of what was acquired along with vibrations One and Two.

When we are in a year with a vibration Three, no matter what age we have reached, what matters is the social life. The first Three we find at the age of three years, when communication and understanding, dialogue, exchange of opinions and information appear. It is the period when we go to kindergarten; we go for the first time out from the warm environment of the family, the mother (Two) and the father (One). It is time for the manifestation of relationships in the social sphere.

Through the nature of Gemini, a year or more ruled by this number refer to the psychic level, to trainings, information, interlinking, exchange of opinions (in a learning environment, a business, through new friends, relationships, paths, in institutions related to communication or tourism), and expansion, research of new horizons (through travels, books, philosophy, friends), being a cheerful, optimistic and daring period.

If there is any literary talent, Three is a beneficial number for writers, journalists, people from the press and television, speakers or those who work with the public. At the same time, Gemini or Mercury predispose to activities related to trade, business or tourism.

The trap of the number Three is that it could bring a lack of focus and the tendency to be scattered. It is very easy to be optimistic and confident (Jupiter), but a dose of realism must be kept. The appetite for life is increased, everything is on the move, the energetic level is enlarged and the world is approached with exuberance.

In a period governed by number Three nothing seems impossible and through the nature of Jupiter it is desirable to live life with innocence, honesty, joy and expansion on several levels. People become more curious or eager to improve themselves, to find out, to answer their questions and philosophize about all and everything. It is probable that the circle of friends or relationships grows and new interests may appear, as the social life will be put first.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Media professions: journalist, reporter, editor, writer, communicator, speaker, TV or radio moderator, comedian, actor, commentator, referee, businessman, trader, travel agent, guide, telephone operator, postman, courier, driver, teacher, salesman, singer, lecturer, composer, philosopher.

Vibration 11/2

40 - 49 yrs

It represents the illumination and the channel toward the subconscious. Although it integrates all the qualities and the traits of the vibration number Two, this is a superior octave of it. It represents the duality itself, the one that creates an interior conflict for the evolution, for the elevation in a superior plan. When it is not perceived as it is, it brings trauma or phobias, strong interior conflicts; it remains at a state of a negative, dual and duplicitous Two.

Eleven is the number of the masters that managed to understand its power and magic and to follow an elevating path. For any cause there is an effect and maintaining the balance between them is an art that only some know how to achieve. This vibration sits at the border between mastery and self-destruction. Eleven is the number of the magic and mystery and can indicate a very strongly developed sixth feeling. The periods ruled by this number invites to emotional states, to altruist relationships and to the incorporation of a superior point of view. It is advisable to watch over the entire mankind, to understand the meaning of live itself, seeing the things as a whole, at an abstract level of perception.

Some people feel the need to activate in these periods in the sphere of social services or healing others, being at the border between the psychologist thinking and the spiritual one. It is advisable to combine the state of detachment with the one of interest, which will give the unique capacity to advise and teach the others!

When it influences long periods of time (from a few years up), it can give the next professions or inclinations:

- Media people, teachers, counselors, poets, inventors, psychologists, ministers, designer, occultist, clairvoyant, guru.

Vibration 2

40 - 49 yrs

Vibration Two refers to the feminine principle, feelings, empathy, sensibility, couple, association, counseling, balance and harmony or temptation, disagreements and attraction, duplicity, Eva.

Representing the woman, a year or a longer period of time under this vibration, can get various connotations as it can be felt or lived in a positive or on the contrary, in a negative, confusing and duplicitous manner.

First of all, through the vibration of the Libra, under its influence it is made clear to us that another point of view exists, one that is different from ours; it is a period when we need to relate to others, to listen and understand them, to form opinions and to act according to the needs of all those involved.

It can be the moment when we meet someone and form a couple. Many people met their soul mate or the ideal partner under this vibration. Depending on several factors, such as: the other vibrations that are connected to it, the moment when it appears, the state in which we find ourselves and our behavior and attitude, it can be a period full of sensibility and empathy, of magic for the couple that was just formed, of fusion of two separate individualities that become one.

When a common way is found, when a balance is established and harmony is reached, number Two can be fully felt and it can transform into pure love! At the same time, by being governed by the Moon, it is also the number that signifies mother and child. That is why, when this number acts in our life, a new member may appear in our family.

Representing Eve, the life situations that this number can lead us to are truly hallucinating. These are years in which temptations appear, we are lured, bewitched and urged to do something radically different. There is the danger that some couples fall apart now and take different roads. Different points of view and divergences are very frequent, with fighting being imminent. Partners take opposite stands, they wish for something else, one of them is attracted to someone else or a woman, whoever she is, makes things more difficult for the couple.

Number Two represents the energetic connection created between us and someone else, so it is also the number of counseling, friends, counselors, partners of any kind, the number of the mother. A person influenced by this number, both in the numerology chart and in the prediction graphs, can be very sensible, empathetic and considerate of the emotions and states of mind of others, and can thus become a good counselor or psychologist. When this number's vibration is used in a negative way, it will create situations and duplicitous states, inner tension due to uncertainty, duality and insecurity in taking decisions.

The key to an entire period ruled by this number is balance and harmony, temperance and attention paid to the temptations that can appear and trouble us (learn from the qualities of the astrological sign Libra). It is good to keep our integrity and to balance our emotions and moods, to live in harmony with ourselves and with those around us, because now we can hear many points of view contrary to our opinions.

We can attract persons in the mirror and through them we can actually see our qualities or defects. In this sense, it is good to notice what we dislike in others' behavior and ask ourselves whether we are not behaving in the same way towards them.

At the same time, through the influence of the Moon, it is preferable to be more secretive, not to expose our thoughts and ideas to the whole world, to have our guards up, because we are more vulnerable. The sensibility of number Two is on the one hand a blessing and on the other it is a curse; that is why it is good to use it in our advantage with relaxing activities: music, painting or any other kind of art that we like or we know brings us

harmony. We can reconcile now with certain people we do not get along with, we can make lasting friendships or we can help others!

A year Two is a year of waiting and patience, when we should not push our luck or start new actions, crazy, risky actions. Now we have to consolidate the relationships that will help built our life and our actions in the future. Aggressiveness, increased enterprising spirit and stubbornness are attitudes that can bring problems. We need to be ready for postponements, delays or blockages in order to learn how to be patient. It is a test of self-control and emotional sensibility. We might have to do someone else's work, to help someone or to cooperate and support, rather than to think of ourselves.

At the same time, it is a period when we are confronted with ambivalent situations, with crossroads, when we need to frequently choose one way or another, the road chosen being irreversible and the unelected option disappearing forever: the college we choose, the profession, the country or the city where we shall live, the person that should stand by our side, left or right, here or there... etc.

When it influences long periods of time (from a few years up) it can lead to the following professions or inclinations:

- Especially the ones regarding the needs or the feelings of others – artist, healer, counselor, psychologist, matrimonial agent, doctor, psychiatrist, scribe, assistant, secretary, lawyer, worker in agriculture or alimentation, chaperon, baby sitter, professions in the sphere of housing/households: architect, interior designer, housekeeper, designer, working with children or elderly persons, hostess, astrologer, social worker.

Vibration 2

58 - 67 yrs

Vibration Two refers to the feminine principle, feelings, empathy, sensibility, couple, association, counseling, balance and harmony or temptation, disagreements and attraction, duplicity, Eva.

Representing the woman, a year or a longer period of time under this vibration, can get various connotations as it can be felt or lived in a positive or on the contrary, in a negative, confusing and duplicitous manner.

First of all, through the vibration of the Libra, under its influence it is made clear to us that another point a view exists, one that is different from ours; it is a period when we need to relate to others, to listen and understand them, to form opinions and to act according to the needs of all those involved.

It can be the moment when we meet someone and form a couple. Many people met their soul mate or the ideal partner under this vibration. Depending on several factors, such as: the other vibrations that are connected to it, the moment when it appears, the state in which we find ourselves and our behavior and attitude, it can be a period full of sensibility and empathy, of magic for the couple that was just formed, of fusion of two separate individualities that become one.

When a common way is found, when a balance is established and harmony is reached, number Two can be fully felt and it can transform into pure love! At the same time, by being governed by the Moon, it is also the number that signifies mother and child. That is why, when this number acts in our life, a new member may appear in our family.

Representing Eve, the life situations that this number can lead us to are truly hallucinating. These are years in which temptations appear, we are lured, bewitched and urged to do something radically different. There is the danger that some couples fall apart now and take different roads. Different points of view and divergences are very frequent,

with fighting being imminent. Partners take opposite stands, they wish for something else, one of them is attracted to someone else or a woman, whoever she is, makes things more difficult for the couple.

Number Two represents the energetic connection created between us and someone else, so it is also the number of counseling, friends, counselors, partners of any kind, the number of the mother. A person influenced by this number, both in the numerology chart and in the prediction graphs, can be very sensible, empathetic and considerate of the emotions and states of mind of others, and can thus become a good counselor or psychologist. When this number's vibration is used in a negative way, it will create situations and duplicitous states, inner tension due to uncertainty, duality and insecurity in taking decisions.

The key to an entire period ruled by this number is balance and harmony, temperance and attention paid to the temptations that can appear and trouble us (learn from the qualities of the astrological sign Libra). It is good to keep our integrity and to balance our emotions and moods, to live in harmony with ourselves and with those around us, because now we can hear many points of view contrary to our opinions.

We can attract persons in the mirror and through them we can actually see our qualities or defects. In this sense, it is good to notice what we dislike in others' behavior and ask ourselves whether we are not behaving in the same way towards them.

At the same time, through the influence of the Moon, it is preferable to be more secretive, not to expose our thoughts and ideas to the whole world, to have our guards up, because we are more vulnerable. The sensibility of number Two is on the one hand a blessing and on the other it is a curse; that is why it is good to use it in our advantage with relaxing activities: music, painting or any other kind of art that we like or we know brings us harmony. We can reconcile now with certain people we do not get along with, we can make lasting friendships or we can help others!

A year Two is a year of waiting and patience, when we should not push our luck or start new actions, crazy, risky actions. Now we have to consolidate the relationships that will help built our life and our actions in the future. Aggressiveness, increased enterprising spirit and stubbornness are attitudes that can bring problems. We need to be ready for postponements, delays or blockages in order to learn how to be patient. It is a test of self-control and emotional sensibility. We might have to do someone else's work, to help someone or to cooperate and support, rather than to think of ourselves.

At the same time, it is a period when we are confronted with ambivalent situations, with crossroads, when we need to frequently choose one way or another, the road chosen being irreversible and the unelected option disappearing forever: the college we choose, the profession, the country or the city where we shall live, the person that should stand by our side, left or right, here or there... etc.

When it influences long periods of time (from a few years up) it can lead to the following professions or inclinations:

- Especially the ones regarding the needs or the feelings of others – artist, healer, counselor, psychologist, matrimonial agent, doctor, psychiatrist, scribe, assistant, secretary, lawyer, worker in agriculture or alimentation, chaperon, baby sitter, professions in the sphere of housing/households: architect, interior designer, housekeeper, designer, working with children or elderly persons, hostess, astrologer, social worker.

Vibration 6

67 - 76 yrs

associated with this vibration number, Libra and Taurus, are ruled by Venus, the planet of love, couple, marriage

and any kind of association, so when it is activated in a person's prediction numerology chart, those periods are related, generally, to emotional life or couple life.

If this number appears when the person in question is single it is possible for them to meet someone. The most long lasting marriages are built, lasting unions are made, and love takes shape under this vibration. The desire to form a family or to unite destinies appears. At the same time, under number Six, children may appear.

If the person who passes through a period ruled by this number is already married, the relationship may be subjected to some tests and trials. If it is a solid relationship based on love and there is no immorality involved, it acquires a new significance that reveals itself to be more important and beneficial for the partners. It is about a "reinstatement" of the feelings, a new stage of the relationship, more mature, more beautiful, and full of meanings.

If, on the contrary, the situation is not as it should be within the couple, the relationship does not have any perspectives or chances to evolve, if one of the two has wronged the other or the moral expectations of the couple are not respected, it is possible that, under this vibration, the relationship might break.

Most divorces, breakups or separation of roads appear in this period - something that does not have to sadden us but make us understand that the relationship was either not suitable for the future anymore or made the person in question stagnate and unable to experience new things in life.

We are warned to be mindful in these periods of the point of view of others, of the feelings and emotions of the people around us. It is good to carefully weigh every situation, to try and maintain balance and harmony, to adopt a peaceful and diplomatic dialogue style.

It is good to seek compassion and the force to help others, to assume responsibilities, to be generous and graceful in thinking.

Depending on the spiritual, intellectual and emotional level where we find ourselves and the way we perceive, it is a moment of family, leading us towards the ones we love or love us. It is a good moment for having children and if we find ourselves in an advanced cycle of life, number Six can indicate a period in which we dedicate our time to taking care of our partner or nephews/ grandchildren.

Referring through Libra to others, vibration Six also symbolizes the associations, any kind of partnerships or some litigations and lawsuits. At the same time, it is the number of counselors, therapists, lawyers, advisers and all of those who work as mediators.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Educator, parent, teacher, cook, counselor, consultant, nurse, healer, doctor, psychologist, coach, marriage counselor, escort, civil status officer, adviser, social assistant, babysitter, lawyer, midwife, gynecologist.

Vibration 0

0 - 10 yrs /10 - 20 yrs

Vibration Zero is the symbol of nothing, of the absolute, chaos and the anti-matter, it is the original egg where, at the same time, both everything and nothing are possible. It is the archetype of potential or latent ideas, of all that does not exist but could exist, of the void that transforms into creation.

Zero represents the origin of all things and also the end of them, being simultaneously a point of departure and

arrival, representing the paradox of identity and the one of non-identity. It is the archetype of the perfect number, expressing the totality and the Universe. In Mayan belief, this number is represented as a spiral, being at the same time the finite Universe as well as the infinite.

When the presence of this number is felt in our life it is good to realize its creative potential, to focus all our being on what we desire and give birth to all possibilities. Used in a negative way it leads to stagnation, walking into a closed circle, isolation, helplessness, the absence or the lack of all activities, destruction.

In Zero are included all the other numbers, vibrations and forces, therefore we need to rise above the energetic vortex of the period in question and take our life into our own hands.

The circle of the number Zero symbolizes the spirit, being the symbol of the whole and health. As a magical force, all that is in the circle is protected and what is outside the circle is rejected.

These periods contain in themselves the potential of all events and possible states, from which we could either benefit or not, the choice or the involvement belonging however entirely to us!

Vibration 4

30 - 40 yrs

Being ruled by Mars, the period influenced by vibration Four represents action, but in small steps (Taurus), with a lot of work and responsibility (Virgo).

The energy of Virgo encourages, in the periods influenced by the vibration Four, to focus one's forces on the details, on analysis, organization and conservation of the things acquired until that moment. We should be more practical, work harder and be more organized without launching ourselves in new actions. It is better to continue the ones we have started in the previous years.

At the same time, Virgo is a sign of piety and sacrifice and for that reason it is good to reevaluate our behavior, to return to ourselves and to the small things in life, to the ones we love and need us. It is possible to have certain difficulties in a period like this if we are too selfish, egocentric or individualistic, in order for us to reevaluate our personality.

In a period ruled by this number, we must take increased care of our body, of our alimentation and to be careful of the way we live physically or morally; this is because certain health problems may appear, signaling that something is not working well in our behavior.

The way we think, the frustrations and negative memories, the things we do not want to give up although they hurt us, repressed feelings and emotions, all of these have somatic effects on the physical body, bringing health problems. That is why we must strengthen our immunity, as well as our relationship with our spiritual self.

At the same time, Virgo invites us to concentrate our forces on work and the work place, on the employees or the colleagues to whom more attention should be paid. The tasks or daily duties must be done very carefully; we should finish them no matter how difficult they may seem, because this is the only way we can reach satisfaction in the periods ruled by number Four.

Through the archetype of Taurus we need to pay more attention to the value of things and work for them. Nothing comes easy but what is acquired in the end has lasting effects in time. It is a good period for putting money aside, for managing, organizing and building, for agriculture, science and business related to feeding and healing people.

It is advisable not to go to trial in these periods or to act in justice, unless the law and the truth are fully on our side. Therefore, it is better to avoid controversy, to be polite in any situation and also to maintain a combination of perseverance and versatile spirit.

Mars warns about accidents, conflicts or injuries if we disperse our energy in a different direction than the one required by this vibration. Under this number nothing comes easily but perseverance, organization and work bring lasting results and also a different, more mature and wiser mentality.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Constructor, gardener, archeologist, manager, lawyer, administrator, administrative officer, the one who does physical work, mechanic, engineer, geologist, farmer, real-estate agent, programmer, mathematician, chemist, sanitary system, architect, handler, craftsman, potter, doctor, dentist, fitness instructor, coach, maid, a cleaning firm or interior designer.

Vibration 6

60 - 70 yrs

associated with this vibration number, Libra and Taurus, are ruled by Venus, the planet of love, couple, marriage and any kind of association, so when it is activated in a person's prediction numerology chart, those periods are related, generally, to emotional life or couple life.

If this number appears when the person in question is single it is possible for them to meet someone. Vibration 8

40 - 50 yrs

Saturn, governor of Capricorn, is the senior of the karma, God of time, guard of the door to the past, the one who brings maturity and wisdom at the same time with the things well done, meant to resist in time.

The energy of Scorpio is of a transforming kind, like the Phoenix Bird that is reborn from its own ashes. It has the role to burn everything that no longer complies with us and make room for a new beginning, a foundation for something more durable in time, more solid.

Therefore, year Eight refers first of all to transformation, death and rebirth of all that is old in our life, of the past that does not let us go further, of karma.

In the natural order, coming after a year Seven, that of interior remodeling, the Eight rebuilds, washes, purifies and transforms all the energy to the exterior, being at the same time a new beginning ($8=7+1$). In esoteric symbolism, the sacred number 888 represents Christ, archetype of death and rebirth. Upside down is a symbol of infinity, of endless life.

It symbolizes all the past, the present and the future, it is focused on this moment, now. All that has been done until the present happens NOW and everything that will be in the future starts from NOW. We always create the present from the past and the future from the current present. This is the essence of karma, the symbol of the snake that eats its tail.

Also, through the vibration of Scorpion, the periods influenced by Eight are related to power, money and business. It is good to work on a strategy, follow it and act. It can be a period of great material winnings or losses, depending on which way we want to act or what we have to correct.

It is advisable not to give up on personal ambitions, to keep focused on what we want, because in the periods ruled by number Eight we benefit from greater strength and a more powerful psychic. The challenge is to achieve a greater degree of detachment and understanding of the fact that power must be used for the good of all and not for destruction. It is advisable to let go of arrogance, intolerance, impatience or egocentrism and to take into account the opinions of others.

When a long period of time stays under the vibration of this number, it can be related to a major financial growth if the person follows the opportunities, risks and acts in this sense. At the same time, it can symbolize a long – term employment in the area of finances, banks or related to the administration of other people's goods.

Operating at a subtle level with karmic energy and with illnesses of a spiritual nature, number Eight draws attention

to health. In these periods accidents may happen that can lead to surgery or injuries, So that it is good to learn from past mistakes, not to remain anchored in them, to transform and evolve in a positive way, cleaning ourselves at a spiritual level.

Eight is the number of power, organization and ritual; therefore, ambition, authority and leadership talent are encouraged. It is good to fight against obstacles, to draw up ambitious strategies and act to win.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Businessman, accountant, administrator, treasurer, bank worker, financial analyst, banker, surgeon, private investigator, politician, builder, judge, executioner, mortuary affairs, moneylender, strategist, manager.

Vibration 9

20 - 30 yrs /50 - 60 yrs

Uranus, the planet that rules Aquarius, is the symbol of freedom, the sky and of awakening, the one that knocks down all the barriers and limitations, the one that orientates everything toward the future, closing the gates of a past obsolete, outdated and unoriginal.

The periods ruled by this number invite us to step forward, to advance in all points of view, to have ideals that we should follow with confidence, to fight for what we are and what we want to be.

When it rules over a long period of time, the person in question lives at maximum intensity, events succeed rapidly and many opportunities appear. Life is in continuous motion and if this person is willing to advance in these respects, then success is guaranteed. When the person reaches the end of the period he/she will feel accomplished and satisfied of what he/she has accomplished. The key to these periods is to accept evolution.

When it influences only a year from our life or a shorter period, its vibration encourages us to let go everything that is not good for us anymore, of all that makes us stay in the same place or no longer complies with our future destiny. These are periods when something in our life must end; those friendships which no longer have a purpose must end, relationships, vices, frustrating employments, certain beliefs, problems or harmful situations should be brought to an end.

Many of these changes might take one by surprise; it is not easy to accept that a lot of things in life are not in accordance with what we once wished for. But we do not have to be sad or suffer because the experiences we live now clearly show us where we got stuck, the direction in which we have to evolve and what is the new path. We can accept it with joy, which will lead us to advancement, novelty and originality, to a new beginning, or we can hold on to the past, we can refuse change which will lead to forced collapse, to events that create shock, fear or depression.

Vibration number Nine can be used to escape the unwanted weight, to end a vice, to sell things that are not useful anymore or to pay old debts. The more space we make in our life, the more chances for new beginnings and experiences we will receive.

We must learn to let go of people and material possessions we grew too attached from which bring us suffering. Success can be achieved through actions that have as purpose the good of the entire mankind.

Nine also represents high ideals, altruism, the desire for equality and peace, the mission to teach and help others, the intellect, genius and the power to detach ourselves from negative patterns; therefore, it invites us to overcome

our own limits in the way to perfection.

When it influences long periods of time (from a few years up), it can lead to the following professions or inclinations:

- Healer, professor, spiritual guide, guru, doctor, diplomat, leader, touristic guide, writer, philosopher, implications in the literary sphere: editor, redactor, spiritual leader, PhD, lector, scholar, researcher, astronomer, astrologer, scientist, painter
